

Proxess

Electronic Access Control for ALL Doors

... for about the price of a standard Grade 1 Lock

CYLINDRICAL

MORTISE

STOREFRONT

PANIC TRIM

No Keys, No Wires, No WiFi and No IT Required!

Typically, electronic access control doors are only deployed on perimeter doors because of cost and complexity... until now. Proxess® now provides all the features of a typical electronic access control system (door and access schedules, audit trails, instant e-rekeys, etc.) for all door applications at a price similar to a standard Grade 1 lock.

Simply issue electronic keys to be turned on or off at the times and days you define and never worry about tracking down people to issue or retrieve keys or rekey ever again. You can assign these e-keys from anywhere...work, home or a beach in Cabo without visiting the lock.

Grade 1: Cylindrical, Mortise, Panic, Storefront	Remote Administration
Cylindrical: Installs in Standard Door Prep	Remote Credential Issuance
Pick-Resistant, SFIC, Restricted Keyway	Android or iPhone, Phone App or Server-Based
Indoor/Outdoor	4AA Batteries: over 75k transactions (3-4 yrs)
Monitored Emergency Key Override	Audit Reports: Door, User, Date, Time, Battery Life
Programmable Lock and Unlock Schedules	Dual Credential Option: BLE, RFID/NFC
User Access Time Schedules	Credential Options: Mobile Key, Card, Fob
Real-Time Audit Reporting	DESFire EV2/3
Unlimited Doors, Unlimited Users	Security: 6 layers of security/encryption
Immediate e-Rekeying	Lockdown Options: Local, Vicinity or Global
Software: Mobile (cloud) or Server Options	Extensive System Notifications

SIMPLE:
Anyone can manage the system. All you need is a lock and a phone. Installs in less than 10 minutes in standard prep doors!

SECURE:
Unhacked DESFire EV2/3 keyfobs, cards and mobile keys with 6 layers of security and encryption.

SCALABLE:
Unlimited doors, users and operators

AFFORDABLE:
Similar to the price of standard Grade 1 locking hardware

Electronic Access Control Functionality for ALL Doors

CYLINDRICAL

End-users face a dilemma when choosing how to handle the locking hardware and access control doors in their facility. Key control is almost impossible to maintain due to lost, stolen and duplicated keys. However, controlling more than a few doors with traditional/legacy electronic access control systems, at thousands per door, is simply not feasible for most budgets.

What if you could provide the security of an electronic access control system for about the same price as most Grade 1 locks? That is what a Proxess® system provides.

Here's how it works...

Typical electronic access control doors require many expensive and labor-intensive parts. Proxess simplifies these challenges centered around a family of wireless intelligent locking hardware.

As the foundation for a Smart Locking System, our all-in-one electronic locksets include a monitored emergency key bypass and provide local lockdown for each door. All the standard security components are integrated, including:

- High security card reader
- Electronic lock
- Door position notification
- Request to exit detector and switch

Further, the lock installs in a standard cylindrical door prep in minutes (mortise, three added 5/8" holes) so there are no unsightly holes to drill in the door. Imagine the time and labor costs saved when compared to traditional electronic access control systems. And, this is not just a typical smart lock. Proxess' unique system architecture provides users the choice to:

Connect by BLE at each door

Bluetooth Smart to Proxess Sync - Uploads Audits & Events

Automatically deliver transactions to the software using our Network-on-Card technology

Card Use Audits & Lock Events Written to Credentials

Connect On-Demand by adding BLE bridges

Bluetooth Smart to Bridge with Audits, Alarms & Updates

Connect on-line, in real-time through PoE and WiFi

Online, Real-time Doors
