NX-STKR-PORTRAIT

Credentials are the heart of security, protecting Proxess® systems. Credential security is typically the most vulnerable point of an access system. Over 80% of existing access systems still deploy outdated credentials which are easily duplicated by equipment that can be purchased by anyone online. Locking system keys are even more vulnerable. Proxess systems utilize the most advanced and flexible credential technology in the industry, DESFIRE EV3, and add six layers of protection, encryption and mutual authentication, providing the highest credential security available.

The key to extending security to ALL doors in your system is transferring system data through intelligence from the card. We call this process...*Network-on-Card*.

FEATURES

Credential Memory: 4k Byte/32k bit to 8k Byte/64k bit

Open architecture DESFire EV3 technology allows multiple and flexible applications on one card (backward compatible to EV1 and EV2 credentials).

Six layers of card security provides the most advanced encryption protection against hacking.

Composite material supplied standard on all cards, providing added protection to heat damage in both the card printing process and normal use.

Limited Lifetime Warranty protection against manufacturer defects.

ADDITIONAL OPTIONS:

- Magnetic Stripe (MS)
- Hole Punch (HP)
- Custom artwork available on request (CA)

HOW TO ORDER CREDENTIALS

Part Number		Specifications				
		Card Technology/ Frequency	Dimensions (LXWXT)	Memory Capacity	Operating Temperature	Slot Punch
ISO Cards						
	NX-4K-ISO	13.56 MHz/ DESFireEV3	3.37 x 2.125 x 0.031 inches	4K byte/32k bit	-22 to 158°F	Vertical or horizontal
	NX-8K-ISO	13.56 MHz/ DESFireEV3	3.37 x 2.125 x 0.031 inches	8K byte/64k bit	-22 to 158°F	Vertical or horizontal
Key Fobs						
	NX-4K- ULTRAFOB	13.56 MHz/ DESFireEV3	2.20 x 1.02 x 0.14 inches	4K byte/32k bit	-13 to 185°F	Keyring
Round Sticker						
	NX-4K-STKR- ROUND	13.56 MHz/ DESFireEV3	1.38 x .043 inches	4K byte/32k bit	-13 to 131°F	N/A
Portrait Sticker						
	NX-4K-STKR- PORTRAIT	13.56 MHz/ DESFireEV3	3.37 x 2.125 x 0.038 inches	4K byte/32k bit	-13 to 131°F	Vertical or horizontal

- Hole Punch (HP)
- Custom artwork available on request (CA)

Proxess Mobile Key (PMK)

iPhone &
Android

For both
ProxessIQ® &
LoxIQ® Systems

Proxess mobile keys deliver *Real-Time to the Offline*.

Cost and communications are traditionally at odds, necessitating compromise between security departments and management. Proxess mobile keys (PMK) bridge that gap, extending real-time rights modifications and audit uploading to and from your interior intelligent, wire-free locksets – with no additional infrastructure cost.

Proxess mobile keys provide an innovative user experience, automatically finding and displaying the authorized door with the strongest signal, allowing just a single tap to open any door in the system, no matter how large the deployment. Further, the PMK's Battery-Respect mode keeps your phone fresh, unlike the operation of other security apps that deplete the phone's battery and require touching a reader with your hand.

Including a checkbox for timed offline operation, the PMK accommodates usage in buildings with poor geographic or interior Cloud or WiFi connections.

The PMKs include all the options of our physical credentials, including Toggle, First-in, Pass-through and Lockdown. The PMK user experience is again enhanced, as this can all be accomplished on-approach rather than beginning the entry request process after you arrive at the door. Further, a lost phone is much more likely to be noticed and reported than a "misplaced" card, securing a vulnerability of traditional card-based systems.

Uniquely, the PMK concurrently delivers greater convenience, improved security and reduced cost.

Configuration options, by each User, include pinning a favorite or most used door to the "open" position on the screen and displaying the full, scrollable list of accessible doors.

The PMK is more like a wallet than a single credential, as a single phone can include a virtually unlimited number of different systems that it can access, perfect for multiple site, system and customer operations.

FEATURES

CONNECTIVITY	BLE comms using both Apple iOS & Android phones and cloud synchronized over WiFi & mobile networks, including rights across multiple sites and systems.
REAL-TIME	Issue, update & revoke mobile keys, open doors, initiate Lockdowns to always-awake Proxess Locksets and transmit lock events and notifications to the Proxess software in real-time.
ALL-DOORS EXPANSION	Expand your current perimeter-only EAC system to any interior door with a Proxess lockset, at near price-parity to mechanical Grade 1 locks, while upgrading to secure and convenient mobile keys.
RE-USABLE	Purchase mobile keys once and recycle/re-issue them to new employees and visitors, keeping costs low and your database clean.
TOUCHLESS DELIVERY	Remotely and instantly issue temporary mobile keys to visitors and contractors. Update employee access rights without an office visit.

ADDITIONAL FEATURES

✓	Real-time credential validation	✓	Vicinity & local Lockdown
✓	Real-time audit transfer	✓	Real-time Admin Notification of Lockdown
✓	Timed, offline operation option	✓	Flexible User operations: Simple, Flexible, Complex/Capable
✓	Automated “nearest door” display	✓	Toggle & First-in modes
✓	Re-programmable, forever credentials	✓	Options to Pin your favorite or list all your doors
✓	Battery-Respect Mode	✓	Apple & Android phone and tablet compatible
✓	No touching the reader needed for wake-up	✓	Multiple site & system compatible

HOW TO ORDER
