

Proxess

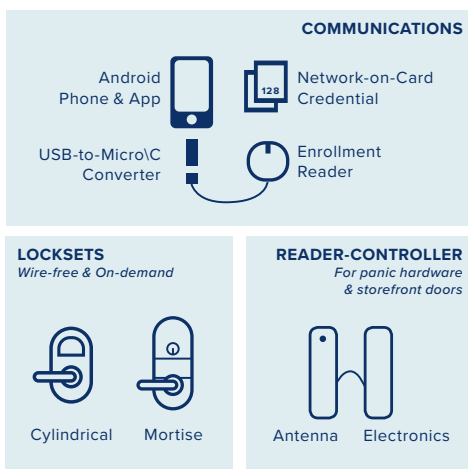

# LoxIQ Scalable Access Control

## LoxIQ™ is a unique access control system software, all on your phone.

After initial setup, the app does not require an internet connection for most tasks and synchronizes in the background when there is an internet connection.

However, unlike any other system, you may add remote administrator phones. More than one device can be used and other users can be invited to the organization. The only practical system size limitation is your phone's storage. For larger data entry tasks, just connect any Bluetooth keyboard.

The Proxess product line handles cylindrical, mortise, panic and storefront applications and multiple types of connectivity—BLE (Bluetooth Low Energy) and Network-on-Card. The app can also become a credential programmer by connecting our enrollment reader, creating and delivering cards, anywhere and at a moment's notice.

Dealers can manage multiple clients from their one mobile phone and multiple-site customers can manage their entire portfolio, segregating operators by their administration of one or more properties.

LoxIQ™ is intuitive and simple to use, with an online software guide, and additional training is available.

LoxIQ™ is meant for those who need just the basics of business-based door entry control. You can later choose to use our robust server-based software.

## Features

- Mobile phone-based software
- UL, ANSI Grade 1, indoor/outdoor, BLE wireless locks
- 5000 event, rotating audit trail and time schedule
- Unlimited users and doors
- Available for cylindrical, mortise, panic and storefront applications
- Monitored mechanical key over-ride
- Installs in standard cylindrical door prep, no extra holes to drill
- Multiple admin phones, multiple accounts on one phone
- Remote credential enrollment
- Migrate to server-based ProxessIQ™ software
- Credentials: DESFire EV2 ISO cards, fobs, stickers or wristbands
- Refer to cylindrical and mortise data sheets on website for more detailed hardware specifications

## SCALABILITY

LoxIQ™ is meant to get even beginners operating quickly. As system requirements become more demanding, users can switch to Proxess' unlimited server-based software.

## SIMPLE & INTUITIVE

Nothing is easier and more intuitive than phone-based systems and LoxIQ™ delivers on these expectations. Online software and hardware manuals keep answers at your fingertips and our training and support teams assure your success.

## FLEXIBLE MANAGEMENT

- Easily add multiple administrator and client management phones.
- Easily add multiple customer accounts.
- Easily add multiple customer sites.

## REDUNDANCY

Each administrator phone app retains the system database so the database can always be active on multiple devices without a complex restoration process.

# HOW TO ORDER

**NOTE:** Customer may leave steps blank if standard option is preferred for that step in the ordering process.
