

Access Control Functionality Available for ALL Doors

MORTISE

STOREFRONT

PANIC

CYLINDRICAL

End-users face a dilemma when choosing how to handle the locking hardware and access control doors in their facility. Key control is almost impossible to maintain due to lost, stolen and duplicated keys. However, controlling more than a few doors with traditional/legacy access control systems, at thousands per door, is simply not feasible for most budgets.

What if you could provide the security of an access control system for about the same price as most Grade 1 locks? That is what a Proxess system provides.

Here's how it works...

Typical access control doors require many expensive and labor-intensive parts. Proxess simplifies these challenges centered around a family of wireless intelligent locking hardware.

As the foundation for a Smart Locking System, our all-in-one electronic locksets include a monitored emergency key bypass and provide local lockdown for each door. All the standard security components are integrated, including:

- High security card reader
- Electronic lock
- Door position notification
- Request to exit detector and switch

Further, the lock installs in a standard cylindrical door prep in minutes (mortise, one added 5/8" hole) so there are no unsightly holes to drill in the door. Imagine the time and labor costs saved when compared to traditional access control systems. And, this is not just a typical smart lock. Proxess' unique system architecture provides users the choice to:

Connect by BLE at each door

Bluetooth Smart to Proxess Sync - Uploads Audits & Events

Automatically deliver transactions to the software using our Network-on-Card technology

Card Use Audits & Lock Events Written to Credentials

Connect On-Demand by adding BLE bridges

Bluetooth Smart to Bridge with Audits, Alarms & Updates

Connect on-line, in real-time through PoE and WiFi

Online, Real-time Doors

SMART ACCESS SYSTEM

Cylindrical Lockset

Mortise Lockset

Cool Features

Checkpoint Reader

Management App

Controller/ Other Doors

Bridge/Gateway

Programmer/ Enrollment Reader

Mobile Credentials

Credentials

SHARED FEATURES

Hardware: Grade 1 hardware, 6 or 7-Pin pick-resistant IC core, restricted keyway; visual/audio indicators, lever clutch force over-ride protection; one SKU for all functions

Indoor/Outdoor Rated

Supports Mobile and Standard Credentials

Unlimited Credentials

Remote Credential Programming

Powered by: Four AA batteries; External 12 VDC 200mA option

Installation: Cylindrical installs in standard door prep, no extra holes

Credential Technology: Bluetooth 5™ or DESFire EV2

System Security: Six layers of security/encryption

System Connectivity: RFID & BLE credentials, Network-on-Card audit transfer, no-tour card enrollment, BLE bridges and real-time wired

Time Schedules and Holidays

Lock Audits: Onboard & Network-on-Card, Network-on-Phone

Monitored Emergency Key Over-ride

Lockdown: Local at door, vicinity/phone, global: BLE bridges or wired

Custom e-mail Notifications

Database Partitioning/Landlord Tenant

Innovative Control Panel: POE, POE+, WiFi, BLE, Secure RS485
