

# SOFTWARE DOWNLOAD & INSTALLATION

# Which software do I download for a Basic system?

From the links provided at [www.Proxess.com/Download](http://www.Proxess.com/Download) if your system is described on this page, then on the computer that will be your primary (the "server") you will download and install "**Proxess-Server-Installer-LocalDB-Bundle.exe**". On all other computers (unlimited), you will only install "**Proxess-Installer-Client.msi**"

Follow the instructions in this section if this describes your system.

There will be only 1 (one) computer (laptop or desktop) used for OR configuration and data entry.

There is 1 (one) main computer (laptop or desktop) used for data entry and one (1) or more additional computers may be used for configuration and data entry, either now or in the future.

Primary computer ("Server"):

Install "**Proxess-Server-Installer-LocalDB-Bundle.exe**"

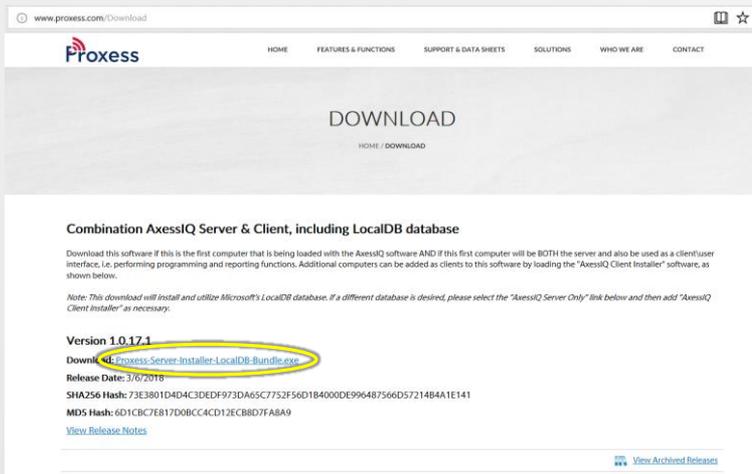

Additional computers ("Clients"):

Install "**Proxess-Installer-Client.msi**"

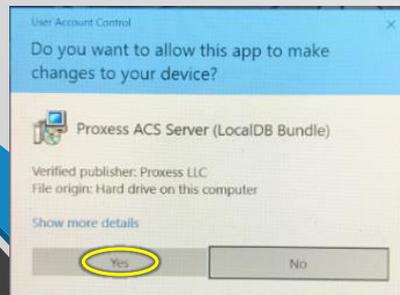

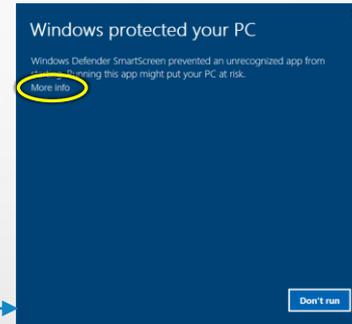

# AxessIQ™ Software Download & Installation 2

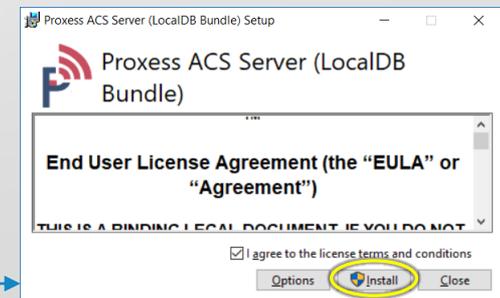

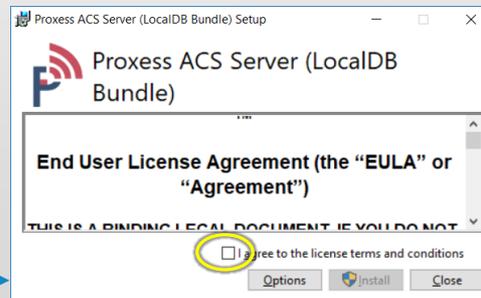

Locate the download link provided at [www.Proxess.com/Download](http://www.Proxess.com/Download) or which has been emailed or otherwise provided to you by the Proxess Support staff or Sales team. For a system that will use the Proxess built-in "LocalDB" database (a Microsoft database product), you will install the file "Proxess-Server-Installer-LocalDB-Bundle.exe" (can only be installed on one computer per system). Double-click on "**Proxess-Server-Installer-LocalDB-Bundle.exe**" and then click on "Download" on the screen that opens.

Follow the windows that open and prompts that appear on this page. Depending on your computer's settings, some of these windows may not appear and can be ignored.

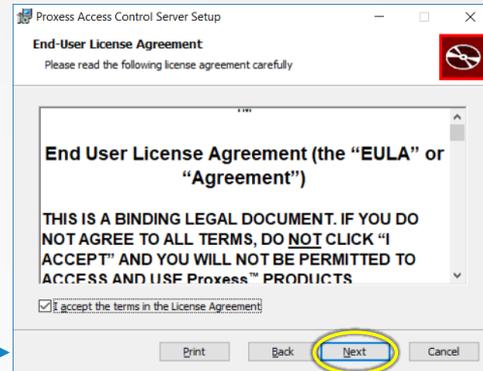

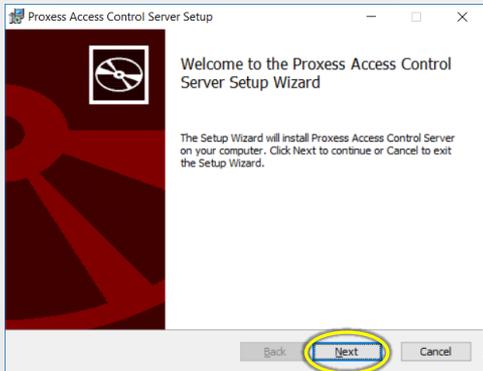

The icon below may blink in your computer's taskbar. If so, click on it to proceed.

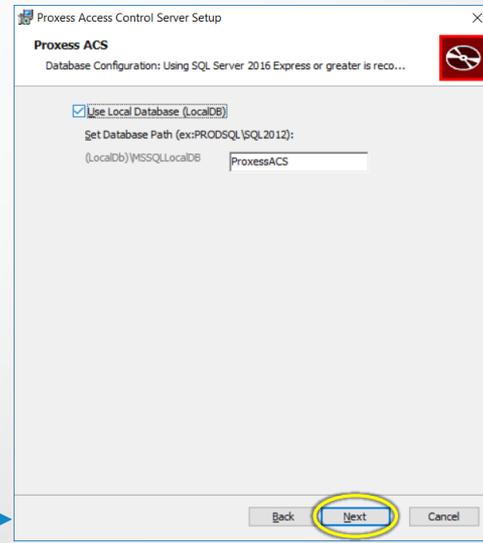

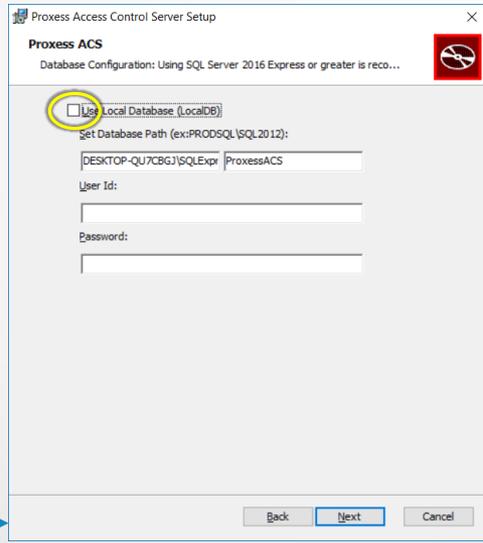

# AxessIQ™ Software Download & Installation 3

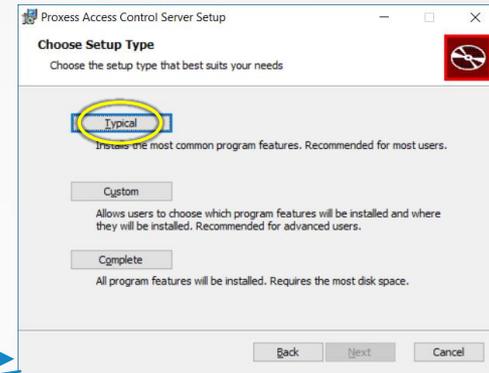

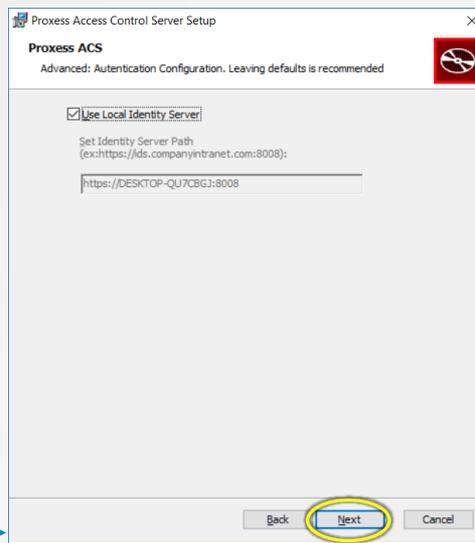

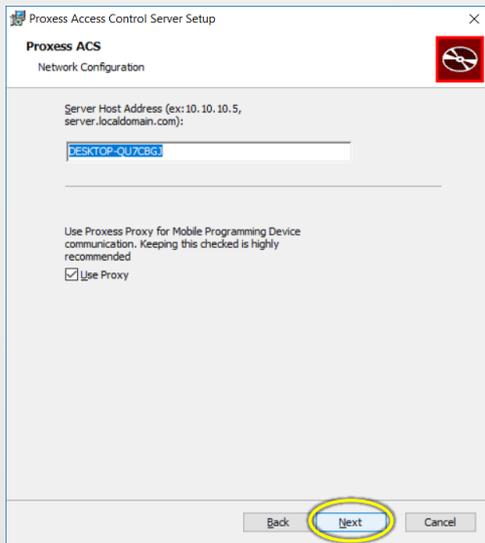

Continue following the windows that open and the prompts that appear on this page.

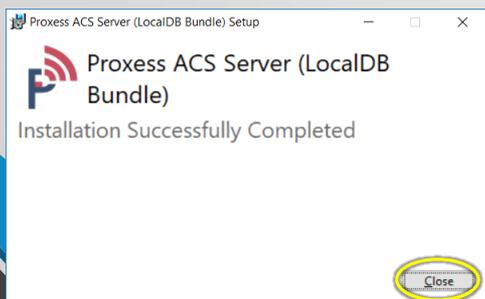

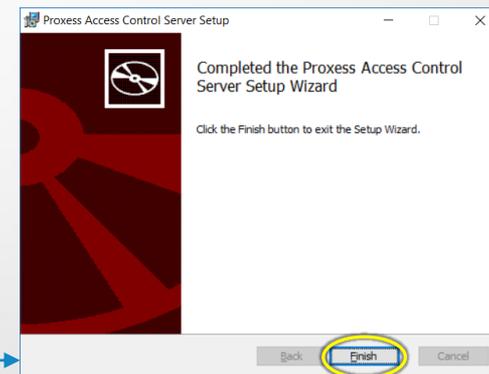

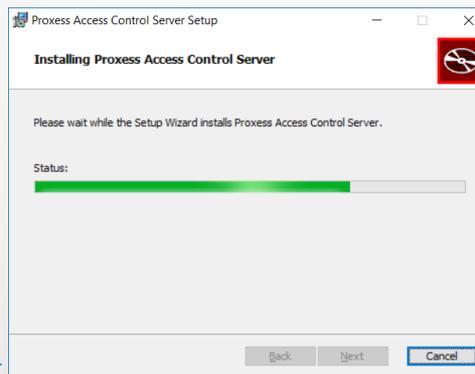

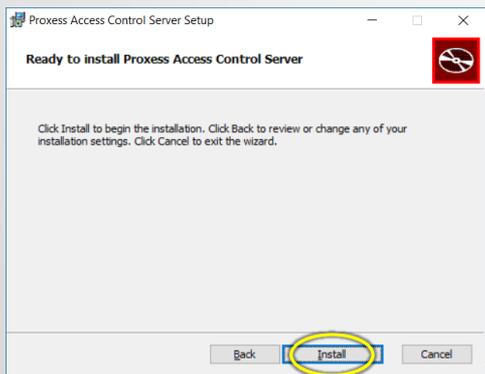

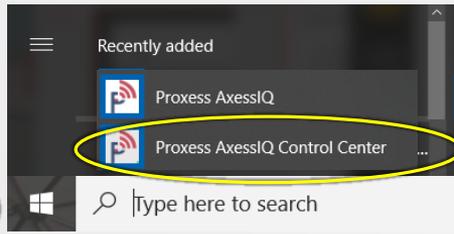

# AxessIQ™ Software Download & Installation 4

Continue following the windows that open and the prompts that appear on this page.

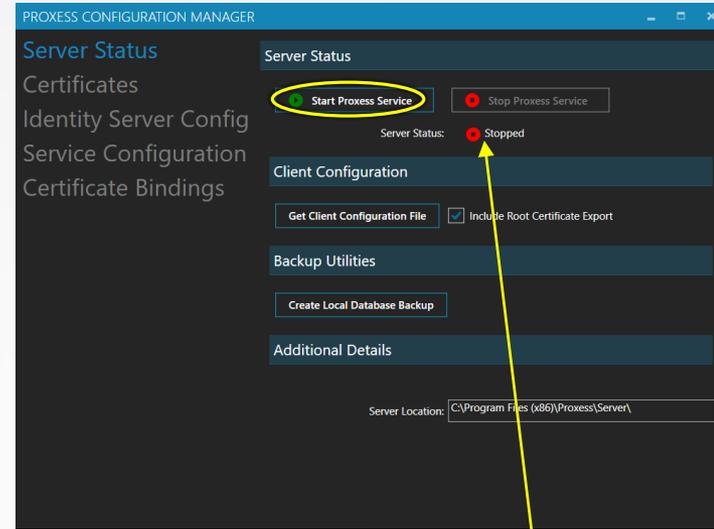

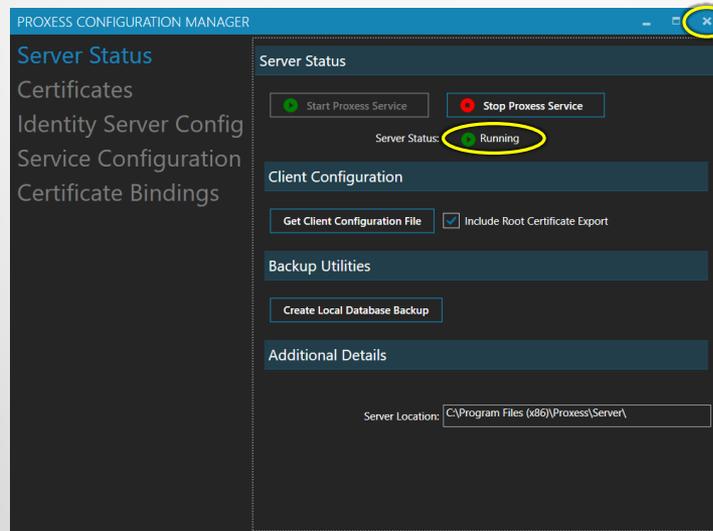

Both the "Server" and "Client" portions of the software have now been installed on your computer.

It is good practice to follow the steps on this page, which will assure that the essential Server services are running on this computer.

Press the Windows™ icon on the keyboard or click on the Windows™ icon on the left side of the Taskbar on the bottom of your screen. Locate and click on the "Proxess AxessIQ Control Center", which will be in both the "Recently Added" section of the pop-up list of programs, as well as under the "P" section down below. If prompted with the window requesting to make changes to your computer, click "Yes".

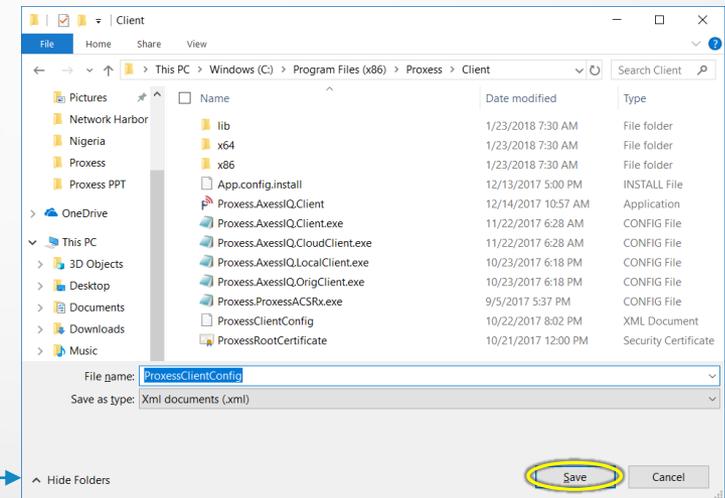

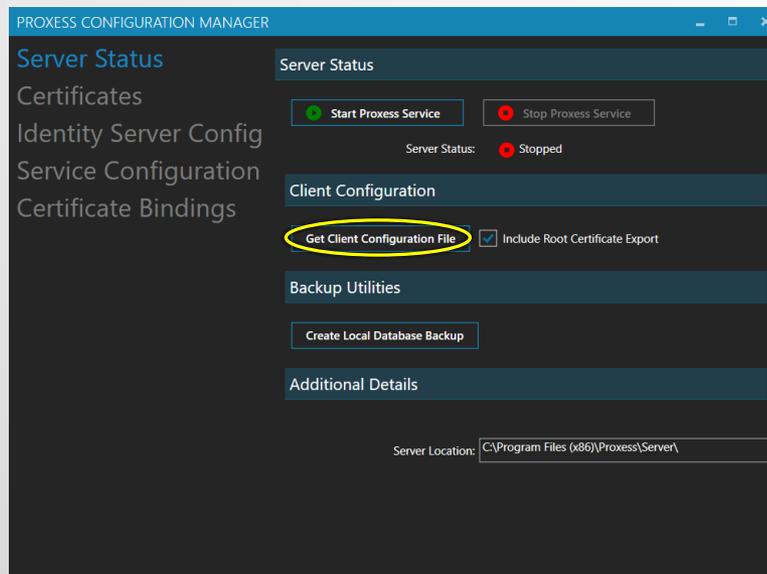

The above screen will open. If the Server Status is shown as "Stopped" then click on "Start Proxess Services". If it is shown as "Running" then you may close this program window.

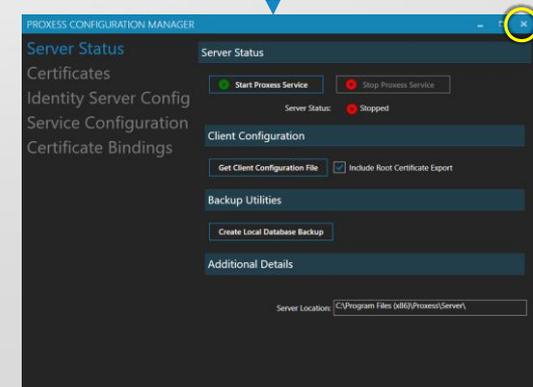

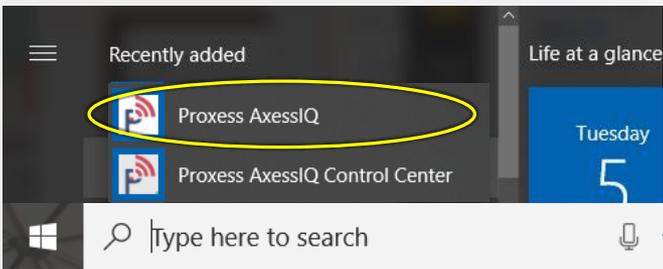

Usually within several seconds (and upwards of about a minute) after clicking "Start Proxess Services" the Server Status will change to "Running".

We will now proceed to initiate the software.

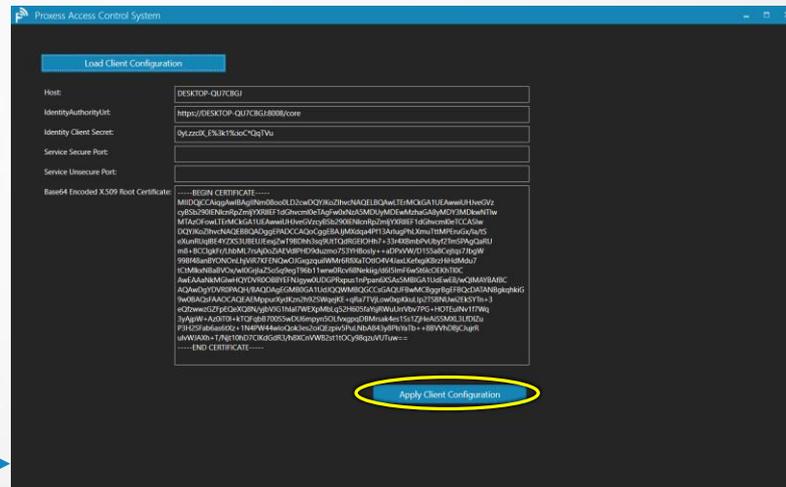

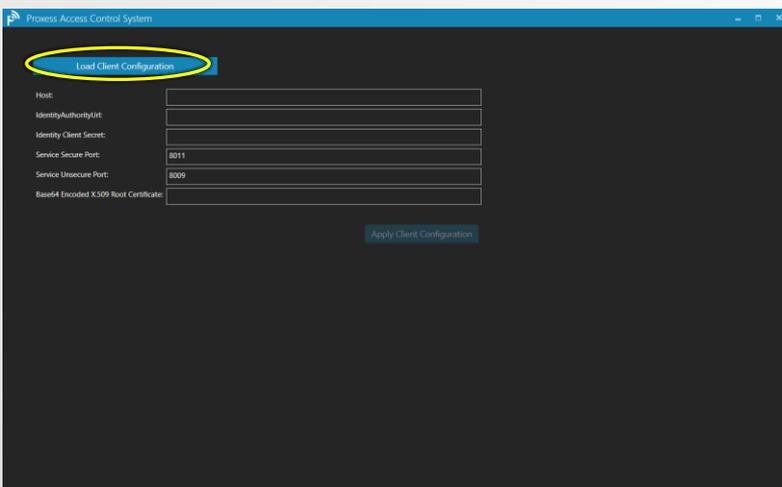

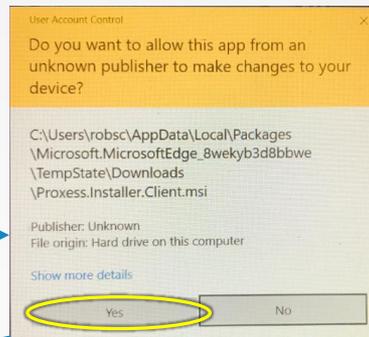

Click the "Get Client Configuration File" button.  
On the "Save As" screen, navigate to the following (preferable) folder location to save the file in:  
"This PC \ Windows (C) \ Program Files (x86) \ Proxess \ Client".  
Click the "Save" button.  
Click on the "x" on the top right of the Proxess Configuration Manager window to close the application.

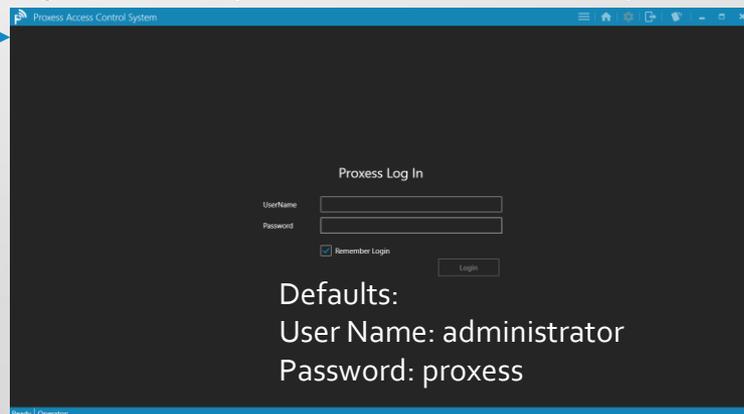

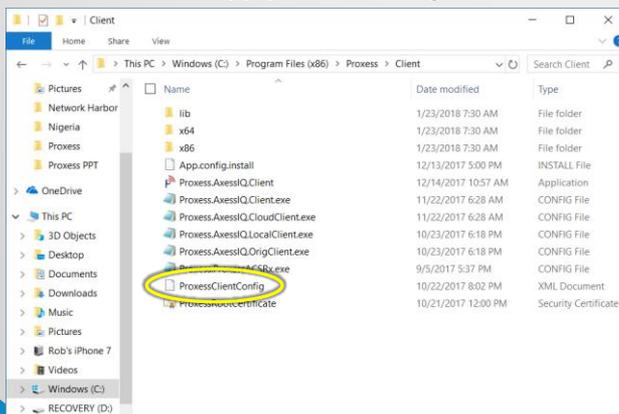

Click the "Windows" icon on your computer and select the "Process AxessIQ" program and allow the app to make changes to your device.

**NOTE:** Other than as stated here, do not make any changes to these screens. Click the "Load Client Configuration" button on the first screen. You may be asked to search for the Configuration file, which may be found in the file you saved it in (shown below). Click on it. On the next screen, click the "Apply Client Configuration" button. The Login screen will open. Enter "administrator" and "proxess".

Defaults:  
User Name: administrator  
Password: proxess

You will now be prompted to change your password, which is strongly recommended, but not required. The AxessIQ™ software will now open.
